50X1-HUM

There was intensive flying with twin-engine aircraft over Rostov-na-Donu (47°15'N/39°53'E), Rostov Oblast, in April 1950. The twin-engine planes towed gliders of almost the same size. Individual planes towing gliders were aloft from dawn to dusk. The aircraft took off from an airfield north of the city, circled the city once or twice at an altitude of about 600 to 800 meters, and released the gliders when flying over the Don River. Both the towing aircraft and gliders landed at the same airfield. Up to 100 gliders were often in the air at the same time.

No Change in Case.
